Presidents Message

Have a great August!

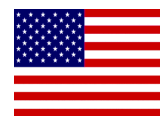

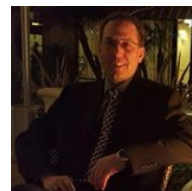

No time to stop now! Even with the heat of July, there are lots of swimming days and party's coming up. Labor Day is September 5th this year and you have only 1 month left to get all your pools ready! Make sure to keep your phosphates down and the algae out of your pools! One of the best ways to control the pool is having a clean filter and running the pump long enough to get 1 turnover a day, for example: If you have a standard 18,000 gallon pool you will need to run the filter pump for 10 hours at 30 gallons per minute. Now I know that seems like a lot of run time and your customers may still think the pump is costing them a ton to run. Educate your customers with the pump cost calculators that are available on most manufactures websites. Using Pentair's calculator, a VS pump running at 1400 rpms for 10 hours should cost about .85 cents to operate. I would think your customers can afford that run time to have a clear and sparkling pool! This will also help keep your chemical cost down and more profit to your bottom line. Let's face it, we are not in this business for our health. We are here to provide a professional service to our customers and to make enough money to continue to survive all year long with a healthy bottom line at the end of the year.

Tech Tip: One of the most common pool leaks are at the skimmer throat. If the grout is missing between the tile and skimmer it is most likely leaking. You can verify this with a simple dye test you can get from one of our wholesalers. Leaking pools cost you and your customer's money. Be sure to attack some of these common leaks before they do more damage to the pool.

'Til next time, keep it clear,

Scott Houseman
President
