## Presidents Message

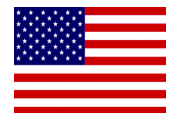

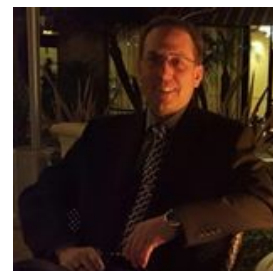

The heat has now come once again to cause us to change how we service our pools and how we should try and protect ourselves from the heat. I always bring a cooler full of ice and bottled water. I drink ten to twelve bottles a day. Another thing you can do is start your route earlier in the morning. If you call your customers ahead, I don't think they would mind if you started their service at 6:00 am or 6:30 am to beat the heat. Wearing a good sun hat will help keep you cool as well. Try to finish your route by 2:00 pm. The hottest part of the day is around 3:00 to 4:00 pm. Try to do your phone calls or office work in the afternoon. As for the pool, there are 7 things I would recommend checking during the heat this summer:

1. Running the pool filter timer at least 8 hours a day. Start the run cycle around 6:00am.
2. Make sure the filter stays cleaned or replace it if needed. (this will save you money on chemical usage).
3. Keep at least 3 chlorine tabs in the floater or chlorinator.
4. Keep the chlorine level around 4.0 or leave your customer some extra chlorine to use during the end of the week.
5. Make sure the conditioner level is high enough to hold the chlorine. Some pools need a higher level than others. For example, salt pool need to be 60ppm to 80ppm.
6. Keep the PH at 7.4, chlorine is more active at 7.4 than at 7.8
7. Check your phosphate numbers and make sure they stay in the recommended ranges. High levels will cause algae growth and more chemical usage.

'Til next time, keep it clear,
