CAPITAL VALLEY IPSSA CHAPTER

Water Watcher

MAY 2021

Featured Speaker for May

Monte is the manager of American Leak Detection - Sacramento, and is responsible for establishing the organization's strategic direction and ensuring exceptional operational performance. Monte is a leak detection industry veteran, with more than 30 years of experience.

American Leak Detection Sacramento has been serving the greater Sacramento area for more than 35 years. A family owned and operated business, American Leak Detection technicians use their collective 85 years of leak detection experience to provide customers with the best possible service in a timely manner.

Monte will provide dinner.

Looking for a Few Good Pools

I'm looking to expand my routes in a few areas:

- ◇ Roseville: General area of Oakmont HS, 3-6 pools depending on size, proximity, and service level.
- ◇ Gold River: 2-4 pools depending on size, proximity, and service level.
- ◇ Folsom: Empire Ranch area, 2-4 pools depending on size, proximity, and service level.
- ◇ EDH: Serrano, Governor's Park, and Franciscan Village areas, 2-4 pools depending on size, proximity, and service level.

Will pay reasonable rates or work them off.

Mike Assenza
River City Pool Care
916-837-8525
Mike@rivercitypoolcare.com

Filter Cleaning Service

- ⇒ Are you behind on your filter cleanings or just tired of doing them yourself?
- ⇒ Do you wish you could hire someone to do them for you?
- ⇒ Someone experienced and insured?

Then contact Alex Assenza @ 916-798-3736, or alexander.assenza@gmail.com

\$30 per filter for cartridges. He worked with me for the first couple years of my business (River City Pool Care), and recently ventured on his own. He has been cleaning my filters, and has worked with a couple other members.

A Message from Monte...

Intruder Alert!

You have determined that the pool is not leaking, but is there a leak somewhere else?

Use the **Water Meter Test**

There are some obvious signs of a water leak -- visible water, water flooding a house or yard. These usually indicate a broken, pressurized water pipe. But there are some not-so-obvious signs of a leaking, concealed pipe, including:

- The sound of running water when no water should be running (could be a leak in your slab)
- The water meter spinning when no water is being used on the property
- Water continuously flowing from yard drains or across the sidewalk
- The swimming pool water level dropping or the auto-fill constantly running
- A hot spot on the floor
- Cracks in walls or floors (caused by a leak in your slab)
- Mildew or excessive moisture under carpets (again, could be a slab leak)
- Unusually high water bills (could be a slab leak or leak in a wall or pool)
- The water company informs you that the average water usage is above normal
- Irrigation systems are also a source for water leaks, shutting the irrigation supply valve can determine if the leak is in this system

If any of these symptoms exist, try the **Water Meter Test**. You will need to conduct the test for 30 minutes when no water is being used anywhere on the property. Here's how:

Find your city water meter.

- Check the triangle or star-shaped leak indicator for movement. If it spins, this indicates a possible leak in the system.

- If the meter is not spinning, water is not moving through the meter.
- Write down the numbers indicated on the meter at the start of this test.
- Return to check the meter reading in 30 minutes.
- If the numbers did not change, you do not have a leak in your pressurized water system. If the number has changed, continue with the following steps.
- Shut off the valves at every toilet in the house and repeat the steps above.

If the numbers have not changed, you may have a running toilet that should be serviced by a plumber. If the numbers have changed, this indicates water consumption even though water was not being used during the test. You may need a leak detection test!

A Snapshot of the Upcoming

DEPARTMENT OF ENERGY DEDICATED PURPOSE POOL PUMP (DPPP) FEDERAL ENERGY EFFICIENCY REGULATIONS

Did you know...

Pool pumps can be the **#2 CONSUMPTION OF ENERGY** in the house?

Home Energy Use

What does this regulation mean for pool pumps?

Pool pumps manufactured for use in and imported for use into the U.S. after July 19, 2021, must meet **new minimum efficiency standards.**

Are the new minimum efficiency standards the same for all pumps?

- No. What we typically call an **Inground pump** will be classified as **self-priming**. Self-priming pumps will be categorized as large and small. Each have different efficiency requirements.
 - Large Inground filter pumps (self-priming)**—These are typically 1 horsepower (HP) and greater. A variable speed pump is the only pump that will meet the minimum performance requirement based upon today's current technology.
 - Small Inground filter pumps (self-priming)**—These are typically 0.5 HP and 0.75 HP. Highly efficient single-speed or two-speed pumps should meet the minimum performance requirements. **Note: The new regulations establish much higher efficiency standards. The majority of existing single-speed pumps will not meet the new minimum requirements.**
- What we typically call an **aboveground pump** will be classified as **non-self-priming**. While less stringent than Inground pumps, **they must still meet new minimum efficiency standards.**
 - Aboveground filter pumps (non-self-priming)**—An energy-efficient, single-speed or two-speed pump should meet the minimum performance requirements. **See above note (a) regarding the higher efficiency standards.**
 - Pressure cleaner booster pumps** also have minimum performance requirements.
 - Energy-efficient, single-speed booster pumps should meet the new efficiency requirements. **See above note (a) regarding the higher efficiency standards.**

What about other pumps?

- The following pumps **do not have** minimum performance requirements:
 - Waterfall pumps (1,800rpm max)
 - Filter pumps with integrated sand and cartridge filters (e.g., small inflatable pools)
 - Rigid (permanent) and storable (inflatable) electric spa pumps (e.g., pumps for hot tubs)

SF 1.0

How will these changes affect HP ratings?

HP ratings will be redefined so that all pumps have a Service Factor of 1.0, and the HP displayed on the pump will be the THP (also referred to as Service Factor Horsepower (SFHP)). This new rating methodology will eliminate dual full-rate and up-rate labeling existing today.

What happens when an existing single-speed pump fails after July 19, 2021? Can I replace it with another single-speed pump?

- It depends on the pump classification.
 - If the replacement is on a large self-priming pump, then the answer is no.
 - If the replacement is on a non-self-priming or a small self-priming pump, then an energy-efficient, single-speed replacement could be an option.

Are there any exemptions?

Three-phase pumps, electric spa (hot tub) pumps and pumps greater than 2.5 HHP (approximately 5 total horsepower (THP)) do not have minimum DPPP efficiency requirements.

Do I have to replace the installed base of existing non-compliant pumps?

No. This regulation does not require bringing all existing installed pumps into compliance. However, **pump replacements made after July 19, 2021, will require a compliant model.**

If my distributor still has remaining inventory of non-compliant pumps, can I purchase and install these pumps?

Yes. There is no time limit on how long it takes to purge distribution of non-compliant products.

What are the new terms/definitions and labeling requirements?

- WEF (Weighted Energy Factor)**—This is a measure of the pump's energy efficiency (how much water is pumped divided by how much energy it takes), similar to miles per gallon in an automobile. The higher the WEF, the more efficient the pump. **Each pump must be labeled with its WEF.**
- HHP (Hydraulic Horsepower)**—This is the amount of hydraulic power produced by the pump's wet-end.
- THP (Total Horsepower) or SFHP (Service Factor Horsepower)**—This is the **new pump HP rating** and is determined by the total HP created at the motor shaft. **Each pump must be labeled with its THP.**

Does it impact residential and commercial?

Yes. Both are impacted. The regulation does not differentiate between a residential or commercial pump. It is based on the pump's physical attributes and not on the pump's application (see exemptions above).

Still Using Tablets for Pool Sanitizing?

Top Reasons to Switch to HASA Sani-Clor®

Advantage Over Tablets

- Highest Available Chlorine
- Fast Acting
- Safe to Use and Transport
- No CYA/No Calcium
- Convenient & Saves Money

Only HASA Sani-Clor® sodium hypochlorite achieves the brilliant clear blue sparkle that your customers expect.

It performs without the chemical by-product build up from tablet use that can lead to cloudy water, more chemical use and costly additional draining. Plus, HASA Sani-Clor® is widely available.

Find out how convenient it can be to convert to liquid sanitizer with our automated daily feeder. Check it out—and receive important information and exclusive offers. Visit our **Solid to Liquid** webpage at [HASA.com/S2L](https://hasa.com/S2L).

BURKETT'S

POOL PLASTERING, INC.

Specializing in Pool Remodeling

Put our experience to work for you!

More than 40,000 pools plastered
and over 15,000 fully remodeled!

We specialize in:

- Waterfalls, Water Features and Spa Additions
- Professional Masonry and Tile
- Concrete Deck Removal and Replacement
- Pool Shallowing and Acapulco Bench Additions
- BBQ Islands, Grills, Fire Pits
- Pool and Spa Replumbing, Skimmer Replacement
- Energy Efficient Equipment and Solar Heating
- Automatic Pool Covers and Fabric Replacement
- Plumbing and Leak Repair Services

All work completed in-house

In 1989, Rob Burkett launched Burkett's Pool Plastering with three employees and his wife Dianne, running the home office. Today, we've grown to more than 200 employees who are dedicated to creating your ultimate backyard environment. When it comes to pool renovation and resurfacing, we're here to exceed your expectations. With competitive pricing and crews that take pride in their work, we treat your family like our family.

Let us help you begin the discovery
of your new backyard today!

Pooltec® - The Chlorine Shortage Solution

Pooltec® 3-in-1 Algaecide - Water Clarifier - Chlorine Booster

- Reduces chlorine use by 35% to 65% and more
- Less CYA conditioner tab use, reduces CYA buildup by 1.0 ppm per tablet
- Only 4 to 8 Fl. Oz. / Weekly per 10,000 gallons

When you consider less chlorine tabs, CYA conditioner, algaecide and clarifier usage, Pooltec pays for itself.

SCOREMORE REWARDS

MISSION:

To provide the pool heater industry's best rewards to Partners who demonstrate loyalty to Raypak and dedication to their customers by purchasing and installing eligible Raypak/Rheem heating products.

PROGRAM DESCRIPTION

Welcome to Raypak's ScoreMore Rewards the program designed to reward you! ScoreMore Rewards offers our partners exclusive opportunities to earn cash back for every eligible Raypak/Rheem product purchase, as well as for participating in qualified professional training and special promotions.

ScoreMore Rewards funds will be loaded onto your Raypak ScoreMore Rewards Prepaid Debit Mastercard. You can use your Raypak ScoreMore Rewards Prepaid Debit Mastercard to make purchases anywhere Debit Mastercard is accepted.

DESIGNED TO REWARD YOU

STEP 1

ENROLLING IS EASY

Go to RaypakScoreMoreRewards.com and select the red "click here" hyperlink to complete the enrollment form. As a ScoreMore Rewards member, you'll earn cash back for each eligible pool and spa heating product you install throughout the year. It's easier than ever to earn, track, and reward yourself with every purchase.

STEP 2

INSTALL & REGISTER ELIGIBLE PRODUCTS

A list of eligible pool and spa heating products is available in the Resources section of this guide. Please review to confirm your Raypak/Rheem heating product purchases are eligible for ScoreMore Rewards earnings.

To submit a claim go to the Promotions page at RaypakScoreMoreRewards.com. From here, you will enter the Invoice Number, Sales Date, Serial Number, and upload Invoice. Then, just click submit.

If successful, A confirmation window will let you know your claim has been received and is under review.

STEP 3

TRACK PRODUCT REGISTRATIONS & DEBIT CARD BALANCE

➤ Login to RaypakScoreMoreRewards.com to view your cash back balance award and funding history.

➤ Use partial or all of earned cash back rewards funds on one or more purchases.

Tracking Your Earned Cash Awards

You can view your product registration history and award and funding history anytime at: RaypakScoreMoreRewards.com or the Raypak ScoreMore Rewards App.
